DEPARTMENT OF THE ARMY PERMIT
GENERAL PERMIT SAJ-20
SAJ-2006-00617 (TLW)
PRIVATE RESIDENTIAL DOCKS/PIER FACILITIES AND MINOR
STRUCTURES IN FLORIDA

Upon recommendation of the Chief of Engineers, pursuant to Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403), general authority is hereby given to construct private residential dock facilities and install minor structures in navigable waters of the United States within the State of Florida subject to the following conditions:

SPECIAL CONDITIONS:

1. Private residential docks/pier facilities shall be designed to accommodate not more than four (4) motorized vessels, including those that may be dry stored such as but not limited to personal watercraft, unless a Florida Fish and Wildlife Conservation Commission approved Manatee Protection Plan is more restrictive (approved MPPs are available at <http://myfwc.com/wildlifehabitats/managed/manatee/protection-plans/>). This includes normal appurtenances such as boat hoists, boat shelters with open sides, stairways, walkways, mooring pilings, dolphins, and maintenance of same.
2. Other minor structures authorized under this general permit include:
 - a. single mooring pilings;
 - b. small mooring dolphins (not to exceed a cluster of four);
 - c. non-commercial information signage;
 - d. boat lifts, hoists, davits. Etc.
 - e. other minor structures that would have less environmental impact than a small dock.
3. No work shall be performed until the applicant submits satisfactory plans for the proposed structure and receives written authorization from the District Engineer.
4. The following areas are specifically excluded from authorization under SAJ-20:

General Permit SAJ-20

- a. Motorboat prohibited zones, no entry zones, and Federal Manatee Sanctuaries.
 - b. All areas regulated under the Lake Okeechobee and Okeechobee Waterway Shoreline Management Plan, located between St. Lucie Lock in Martin County and W.P. Franklin Lock in Lee County.
 - c. Biscayne Bay National Park Protection Zone (Dade County), and areas identified in the Wild and Scenic Rivers Act (16 U.S.C. 1317, et seq.): the St. Mary's River, from its headwaters to its confluence with the Bells River; the entire Wekiva River, including Wekiwa Springs Run, Rock Springs Run, the entire Seminole Creek, and Black Water Creek from its outfall at Lake Norris to its confluence with the Wekiva River; and the Loxahatchee River from Riverbend Park downstream to Jonathan Dickinson State Park.
 - d. The following state parks: John Pennekamp Coral Reef State Park, Lignum Vitae Key State Botanical Site and Aquatic Preserve, Long Key State Park, Curry Hammock State Park, and Bahia Honda State Park.
 - e. Kings Bay/Crystal River/Homosassa/Salt River system (Citrus County) and canals connected to these waterways.
 - f. Lake Miccosukee (located on the common boundary of Leon and Jefferson Counties).
 - g. Within the coastal lakes, their outfalls and/or the shore areas between the lakes and the Gulf of Mexico as depicted on the attached map (Attachment 1).
 - h. New and expanded pile supported structures in Elkhorn coral (*Acropora palmata*) and Staghorn coral (*Acropora cervicornis*) designated critical habitat (Attachment 2) where essential features are present.
 - i. Areas on or contiguous to ocean beaches.
 - j. Smalltooth sawfish limited exclusion zones (Attachment 3).
5. No structures shall be authorized by SAJ-20 within the boundaries of the Timucuan Ecological and Historical Preserve (Duval County) until the National Park Service has been contacted and offered the opportunity to submit comments to the Corps on the effects of the proposed project on the preserve.
6. SAJ-20 has undergone consultation with U.S. Fish and Wildlife Service (FWS) and the National Marine Fisheries Service (NMFS) in accordance with Section 7, Endangered Species Act, on Federally listed species and designated critical habitat within their purview (Attachment 4). If the proposed activity requires additional consultation under the

General Permit SAJ-20

Endangered Species Act with the FWS and/or NMFS on: 1) these or any other federally listed threatened or endangered species or species proposed for Federal listing; or 2) designated critical habitat or proposed designated critical habitat for these or any other federally listed threatened or endangered species, or proposed species, then, until consultation is reinitiated and concluded, and the agency determines that the activity will not jeopardize the continued existence or adversely modify critical habitat, the proposed activity cannot be authorized under SAJ-20.

7. Prior to verification of authorization, the dichotomous key titled, *"The Corps of Engineers, Jacksonville District, and the State of Florida Effect Determination Key for the Manatee in Florida, April 2013,"* (see <http://www.saj.usace.army.mil/Missions/Regulatory/SourceBook.aspx>) will be used to determine potential manatee impacts. Those determined to be a "may affect" to the manatee will not be authorized unless consistent with the 2011 Manatee Programmatic Consultation or individual consultation on the project is required and has been reinitiated and concluded with the U.S. Fish and Wildlife Service in accordance with the Endangered Species Act. Additionally, depending on the location of the project, some projects determined to be "may affect, not likely to adversely affect" will not be authorized until consultation on the project has been concluded. Consultation or concurrence from the Service is required for any project located within a Warm Water Aggregation Area (WWAA). *Note: The manatee key may be subject to revision at any time. It is our intention that the most recent version of this technical tool will be utilized during the evaluation of the permit application.*

8. For projects in waters accessible to manatees, the Permittee will utilize the *"Standard Manatee Conditions for In-Water Work, 2011"* (see <http://www.saj.usace.army.mil/Missions/Regulatory/SourceBook.aspx>) and/or requirements as appropriate for the proposed activity. *Note: The manatee conditions may be subject to revision at any time. It is our intention that the most recent version of these conditions will be utilized during the evaluation of the permit application.*

9. Structures authorized under this general permit must satisfy the Project Design Criteria (PDCs) provided for all activities and pile-supported structures as stated in the U.S. Army Corps of Engineers Jacksonville District's Programmatic Biological Opinion, November 2017 (JAXBO). In accordance with the Endangered Species Act, the Corps will seek individual consultation with the National Marine Fisheries Service (NMFS) for all projects that do not comply with the PDCs of JAXBO prior to verification. Please note that failure to comply with the attached PDCs, where a take of listed species occurs, would constitute an unauthorized take, and noncompliance with this general permit. The NMFS is the appropriate authority to enforce the terms and conditions of JAXBO. The most current version of JAXBO can be accessed at the Jacksonville District Regulatory Division internet webpage in the Endangered Species section of the Sourcebook located at:

<http://www.saj.usace.army.mil/Missions/Regulatory/SourceBook.aspx>

Note: JAXBO may be subject to revision at any time. It is our intention that the most recent version of these conditions will be utilized during the evaluation of the permit application.

General Permit SAJ-20

10. The Permittee shall adhere to the NOAA Fisheries Service *Vessel Strike Avoidance Measures and Reporting /or Mariners* (Attachment 8) (see <http://www.saj.usace.army.mil/Missions/Regulatory/SourceBook.aspx>).
11. In accordance with Section 7 of the Endangered Species Act, projects proposed within the following areas cannot be authorized until consultation on the projects have been concluded with the U.S. Fish and Wildlife Service (USFWS): Within Gulf sturgeon designated critical habitat under the jurisdictional responsibility of the USFWS; within areas with federally listed freshwater mussels, mussel critical habitat, or freshwater mussels proposed for federal listing. These areas include the range of the Suwannee moccasinshell The Suwannee Moccasinshell's current range in Florida includes: the Suwannee River mainstem from the confluence of Hart Springs (–82.954, 29.676) in Dixie–Gilchrist Counties, upstream 137 km (85 mi) to the confluence of the Withlacoochee River (–83.171, 30.385) in Madison–Suwannee Counties; and the Santa Fe River from its confluence with the Suwannee River in Suwannee–Gilchrist Counties (–82.879, 29.886), upstream 50 km (31 mi) to the river's rise (the Santa Fe River runs underground for more than three miles, emerging at River Rise Preserve State Park) in Alachua County (–82.591, 29.873).
12. Projects proposing installation of any size of metal piling or metal sheet piling by impact hammer cannot be authorized under SAJ-20 until individual consultation has been initiated and concluded with the U.S. Fish and Wildlife Service and/or the National Marine Fisheries Service, as appropriate
13. No work shall be authorized by SAJ-20 which may have direct or indirect adverse impacts to hard or soft corals, including listed corals, mangroves, estuarine emergent vegetation, marine emergent vegetation, and/or the following species of submerged aquatic vegetation: shoal grass (*Halodule wrightii*), paddle grass (*Halophila decipiens*), star grass (*Halophila engelmanni*), Johnson's seagrass (*Halophila johnsonii*), widgeon grass (*Ruppia maritima*), manatee grass (*Syringodium filiforme*), and turtle grass (*Thalassia testudinum*). Indirect effects include secondary and cumulative effects.
14. Adverse impacts to aquatic vegetation from dock construction shall be avoided by adherence to the joint U.S. Army Corps of Engineers'/National Marine Fisheries Service's "*Construction Guidelines in Florida for Minor Piling-Supported Structures Constructed in or over Submerged Aquatic Vegetation (SAV), Marsh or Mangrove Habitat - U.S. Army Corps of Engineers/National Marine Fisheries Service - August 2001*" (see <http://www.saj.usace.army.mil/Missions/Regulatory/SourceBook.aspx>). *Note: The Construction Guidelines may be subject to revision at any time. It is our intention that the most recent version of the technical tool will be utilized during the evaluation of the permit application.*
15. This permit does not authorize dredging or the removal of red mangrove (*Rhizophora mangle*).
16. For projects proposed adjacent to Federally-maintained channels, no structure,

General Permit SAJ-20

including mooring piles, authorized under this regional general permit shall be within the established setback, calculated from the near design edge of the channel, until coordination and concurrence by the Navigation business line is complete. The setback may vary between different Federal channels and between specific reaches of the same Federal channel. Exact locations of the proposed work may be verified by use of the Florida State Plane Coordinate System (XY coordinates). Any activity within Federal project lands including rights-of-way, may require the permittee to enter into a consent-to-easement or other real estate instrument with the Real Estate Division, U.S. Army Corps of Engineers, Jacksonville or Mobile District, as appropriate, prior to the commencement of any construction activity.

17. For projects authorized under the SAJ-20 in navigable waters of the United States, the Permittee understands and agrees that, if future operations by the United States require the removal, relocation, or other alteration, of the structures or work herein authorized, or if in the opinion of the Secretary of the Army or his authorized representative, said structure or work shall cause unreasonable obstruction to the free navigation of the navigable waters, the Permittee will be required, upon due notice from the Corps of Engineers, to remove, relocate, or alter the structural work or obstructions caused thereby, without expense to the United States. No claim shall be made against the United States on account of any such removal or alteration. A structure authorized under this regional general permit must not interfere with general navigation.

18. No activity may cause more than a minimal adverse effect on navigation. Any safety lights and signals prescribed by the U.S. Coast Guard, through regulations or otherwise, must be installed and maintained at the Permittee's expense on authorized facilities in navigable waters of the United States.

19. To maintain no less than 50% of the open-water portion of the waterbody available for public use, structures constructed on canals or channels must not extend more than 25% of the canal/channel width, excluding dense areas of shoreline vegetation such as mangroves, as measured from the project location to the opposite shoreline.

20. Any proposed regulatory action that modifies, alters, or is built upon or adjacent to an existing federal project, does not meet the required Setback Guidance or is constructed within a federal project right-of-way may require permission under Section 14 of the RHA 33 USC 408 (Section 408) and may require coordination with the Engineering Division. Any structure within 62.5 feet of a federal navigation structure (with the exception of single-family docking structures) shall require coordination under Section 408. Any degradation, relocation, penetration, or work under a Corps levee, dike, dam, or water retaining structure and any proposed work within 15 feet of a federal canal top of bank (such as the Okeechobee Waterway or the Central and South Florida Flood Control Canals), within two feet of the top edge of slope of a federal navigation channel or within 50 feet of a Corps dam requires coordination under Section 408.

General Permit SAJ-20

21. Cultural Resources/Historic Properties:

a. No structure or work shall adversely affect, impact or disturb properties listed in the National Register of Historic Places (NRHP) or those eligible for inclusion in the NRHP.

b. If during the ground disturbing activities and construction work within the permit area, there are archaeological/cultural materials encountered which were not the subject of a previous cultural resources assessment survey (and which shall include, but not be limited to: pottery, modified shell, flora, fauna, human remains, ceramics, stone tools or metal implements, dugout canoes, evidence of structures or any other physical remains that could be associated with Native American cultures or early colonial or American settlement), the Permittee shall immediately stop all work in the vicinity and notify the Corps within two calendar days. The Corps shall then notify the Florida State Historic Preservation Officer (SHPO) and the appropriate Tribal Historic Preservation Officer(s) (THPO(s)) to assess the significance of the discovery and devise appropriate actions.

c. Additional cultural resources assessments may be required of the permit area in the case of unanticipated discoveries as referenced in accordance with the above Special Condition ; and if deemed necessary by the SHPO, THPO(s), or Corps, in accordance with 36 CFR 800 or 33 CFR 325, Appendix C (5). Based, on the circumstances of the discovery, equity to all parties, and considerations of the public interest, the Corps may modify, suspend or revoke the permit in accordance with 33 CFR Part 325.7. Such activity shall not resume on non-federal lands without written authorization from the SHPO for finds under his or her jurisdiction, and from the Corps.

d. In the unlikely event that unmarked human remains are identified on non-federal lands, they will be treated in accordance with Section 872.05 Florida Statutes. All work and ground disturbing activities within a 100-meter diameter of the unmarked human remains shall immediately cease and the Permittee shall immediately notify the medical examiner, Corps, and State Archeologist within the same business day (8-hours). The Corps shall then notify the appropriate SHPO and THPO(s). Based, on the circumstances of the discovery, equity to all parties, and considerations of the public interest, the Corps may modify, suspend or revoke the permit in accordance with 33 CFR Part 325.7. Such activity shall not resume without written authorization from the State Archeologist and from the Corps.

22. No work shall be performed until after the Permittee provides notification to the owner(s) or operator(s) of any marked utilities in the area of the structure.

23. Turbidity control measures may be required, and the work must be conducted so as to prevent violations of State Water Quality Standards as established in sections 62-4.242 and 62-4.244 of the Florida Administrative Code and Chapters 62-302, 62-520, 62-522, and 62-550 of the Florida Administrative Code.

24. Water Quality Certification (WQC) or waiver thereto, and Coastal Zone

General Permit SAJ-20

Consistency (CZCC): Activities qualifying for this regional general permit (RGP) must be authorized by the applicable permit or exemption under Part IV of Chapter 373, F.S., and by any authorization required to use or occupy state-owned submerged lands (SSL) under Chapter 253, F.S., and, as applicable Chapter 258 F.S. Such permit, issued by the Department of Environmental Protection, a water management district under s. 373.069, F.S., or a local government with delegated authority under s. 373.441, F.S., will provide the applicable WQC or waiver thereto, and CZCC. WQC is waived for activities authorized under this RGP that qualify for an exemption under s. 403.813(1)(i) or 373.406, F.S., or the rules of Florida Administrative Code (F.A.C.) adopted under Part IV of Chapter 373, F.S. The Corps under C.F.R. § 325.2(b)(2) may presume CZCC for the above exempt activities by operation of s. 380.23(7), F.S., provided the activity receives the applicable authorization to use and occupy SSL under Chapter 253, F.S., and, as applicable, Chapter 258, F.S., and the rules F.A.C. adopted thereunder. The Corps shall not be precluded from acting on a request to use this RGP before the applicable SSL authorization is granted.

25. This authorization does not include conditions that would prevent the 'take' of a state-listed fish or wildlife species. These species are protected under sec. 379.411, Florida Statutes, and listed under Rule 68A-27, Florida Administrative Code. With regard to fish and wildlife species designated as species of special concern or threatened by the State of Florida, you are responsible for coordinating directly with the Florida Fish and Wildlife Conservation Commission (FWC). You can visit the FWC license and permitting webpage (<http://www.myfwc.com/license/wildlife/>) for more information, including a list of those fish and wildlife species designated as species of special concern or threatened. The Florida Natural Areas Inventory (<http://www.fnai.org/>) also maintains updated lists, by county, of documented occurrences of those species.

26. Conformance with the descriptions and criteria contained herein does not necessarily guarantee authorization under this regional general permit. The District Engineer reserves the right to require that any request for authorization under this regional general permit be processed as a standard permit.

27. This regional general permit will be valid for a period of five years from the date specified above unless suspended or revoked by the District Engineer prior to that date. If SAJ- 20 expires or is revoked prior to completion of the authorized work, authorization of activities that have commenced or are under contract to commence in reliance on SAJ-20 will remain in effect provided the activity is completed within 12 months of the date SAJ-20 expired or was revoked.

28. The Permittee shall perform all work in accordance with the general conditions for permits. The general conditions attached hereto are made a part of this permit (Attachment 5).

Attachment 5

GENERAL CONDITIONS FOR DEPARTMENT OF THE ARMY GENERAL PERMITS:

1. The time limit for completing the work authorized ends on **March 27, 2023**. If you find that you need more time to complete the authorized activity, submit your request for a time extension to this office for consideration at least one month before the above date is reached.

2. You must maintain the activity authorized by this permit in good condition and in conformance with the terms and conditions of this permit. You are not relieved of this requirement if you abandon the permitted activity, although you may make a good faith transfer to a third party in compliance with General Condition 4 below. Should you wish to cease to maintain the authorized activity or should you desire to abandon it without a good faith transfer, you must obtain a modification of this permit from this office, which may require restoration of the area.

3. If you discover any previously unknown historic or archeological remains while accomplishing the activity authorized by this permit, you must immediately notify this office of what you have found. We will initiate the Federal and State coordination required to determine if the remains warrant a recovery effort or if the site is eligible for listing in the National Register of Historic Places.

4. If you sell the property associated with this permit, you must obtain the signature and the mailing address of the new owner in the space provided and forward a copy of the permit to this office to validate the transfer of this authorization.

5. If a conditioned water quality certification has been issued for your project, you must comply with the conditions specified in the certification as special conditions to this permit. For your convenience, a copy of the certification is attached if it contains such conditions.

6. You must allow representatives from this office to inspect the authorized activity at any time deemed necessary to ensure that it is being or has been accomplished in accordance with the terms and conditions of your permit.

Further Information:

1. Limits of this authorization.

- a. This permit does not obviate the need to obtain other Federal, State, or local authorizations required by law.
- b. This permit does not grant any property rights or exclusive privileges.
- c. This permit does not authorize any injury to the property or rights of others.
- d. This permit does not authorize interference with any existing or proposed Federal projects.

2. Limits of Federal Liability. In issuing this permit, the Federal Government does not assume any liability for the following:

- a. Damages to the permitted project or uses thereof as a result of other permitted or unpermitted activities or from natural causes.
- b. Damages to the permitted project or uses thereof as a result of current or future activities undertaken by or on behalf of the United States in the public interest.
- c. Damages to persons, property, or to other permitted or unpermitted activities or structures caused by the activity authorized by this permit.
- d. Design or construction deficiencies associated with the permitted work.
- e. Damage claims associated with any future modification, suspension, or revocation of this permit.

3. Reliance on Applicant's Data: The determination of this office that issuance of this permit is not contrary to the public interest was made in reliance on the information you provided.

4. Reevaluation of Permit Decision: This office may reevaluate its decision on this permit at any time the circumstances warrant. Circumstances that could require a reevaluation include, but are not limited to, the following:

- a. You fail to comply with the terms and conditions of this permit.
- b. The information provided by you in support of your permit application proves to have been false, incomplete, or inaccurate (see 4 above).
- c. Significant new information surfaces which this office did not consider in reaching the original public interest decision.

Such a reevaluation may result in a determination that it is appropriate to use the suspension, modification, and revocation procedures contained in 33 CFR 325.7 or enforcement procedures such as those contained in 33 CFR 326.4 and 326.5. The referenced enforcement procedures provide for the issuance of an administrative order

requiring you comply with the terms and conditions of your permit and for the initiation of legal action where appropriate. You will be required to pay for any corrective measures ordered by this office, and if you fail to comply with such directive, this office may in certain situations (such as those specified in 33 CFR 209.170) accomplish the corrective measures by contract or otherwise and bill you for the cost.

5. When the structures or work authorized by this permit are still in existence at the time the property is transferred, the terms and conditions of this permit will continue to be binding on the new owner(s) of the property. To validate the transfer of this permit and the associated liabilities associated with compliance with its terms and conditions, have the transferee sign and date below.
