

Model Project Partnership Agreement For Section 205 Projects

Applicability: For a structural flood risk management project (formerly referred to as flood damage reduction or flood control project) undertaken pursuant to the authority contained in Section 205 of the Flood Control Act of 1948, as amended (33 U.S.C. 701s).

History:

1. New model approved 18 January 2017.
2. 15 May 2017 Update: Updated Instructions to address approval of certain amendments. Added a new Option 6 (Nonstructural Features).
3. 3 January 2019 Update: Updated to include recent ASA(CW) revisions to all new PPAs; to address possible conclusion at the end of design; and to include clarifications and editorial revisions.
4. 4 October 2019 Update: Updated Option 6 (Projects with Nonstructural Flood Risk Management Features) to add an Option 6B that allows for reimbursement of real property interests, placement area improvements, and relocation under certain conditions; and to provide clarifications and editorial revisions.
5. 22 January 2020 Update: Updated Option 6 (Projects with Nonstructural Flood Risk Management Features) to provide example calculations for Option 6B and clarifications.
