St. Joseph, Missouri, 64501

Missouri River Navigators Meeting
February 26, 2020

Bill Becker -- CEO

MK Minerals Plant • Wathena, Kansas

Company Background

- MK Minerals, Inc, started production of hi-calcium lime in 1999 at its newly constructed facility in Wathena, KS. Since then their product line has expanded to include gypsum and dolomitic lime as well as providing bagged product throughout the USA and abroad.
- In 2015, completion of a second production line was installed to address growing demand in all market sectors.

TransPort 360, LLC

THE PORT IN SAINT JOSEPH, MO

Transport 360, plays an important role in the economic development of the community. Built to accommodate everything from small business to major corporations – we provide our clients access to the world.

St. Joseph became the head water for the journey west as hundreds of thousands of settlers arrived by steamboat and hundreds of wagon trains lined the streets waiting to be ferried across the Missouri River. The covered wagons, oxen and supplies purchased by the emigrants established the economic foundation of the city.

The Delta King 1938

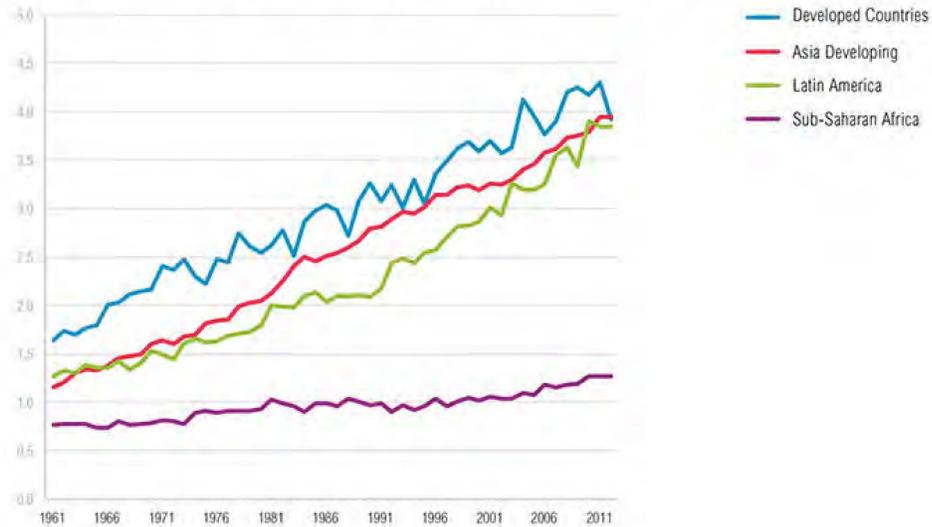

Challenges:

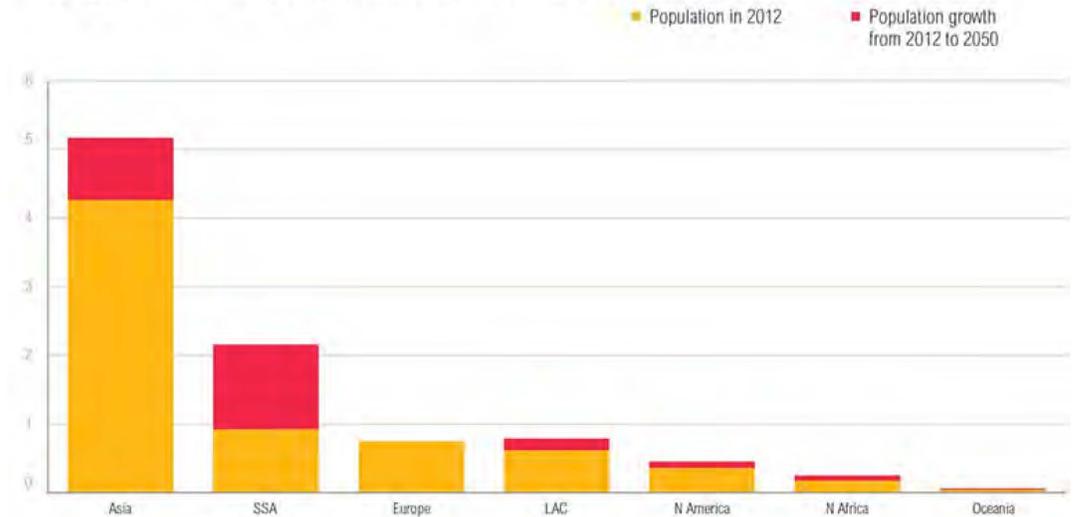

- Reputation of the River
- Overhead
- Cyclical nature of Ag Products
- Cyclical nature of River
- Competitive resources in tugboat and barge availability.
- Adequate commerce on the river from other terminals and sources.

Cereal Yields (in metric tons per hectare)

Projected Population Growth (in billions)
