Jacksonville Permits Section

PUBLIC NOTICE

Permit Application No. SAJ-2017-02270 (SP-BJC)

TO WHOM IT MAY CONCERN: The Jacksonville District of the U.S. Army Corps of Engineers (Corps) has received an application for a Department of the Army permit pursuant to Section 404 of the Clean Water Act (33 U.S.C. §1344) and Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. §403) as described below:

APPLICANT: Mr. Mark Wilkinson
8627 Pebble Creek Lane
Jacksonville, Florida 32256

WATERWAY AND LOCATION: The project would affect waters of the United States associated with Cabbage Creek (tidal). The project site is located at 411 North Roscoe Boulevard, Section 40, Township 3 South, Range 28 East, Ponte Vedra Beach, St. Johns County, Florida.

Directions to the site are as follows: From Interstate-95 take Exit 344 and head east. Proceed until the ramp onto State Road A1A and head south. Proceed until the intersection of Solana Road and turn right. Proceed until the intersection of North Roscoe Boulevard and turn right. Proceed for 0.6-mile and the project site is on the right-side of the roadway.

APPROXIMATE CENTRAL COORDINATES: Latitude 30.220168°
Longitude -81.411804°

PROJECT PURPOSE:

Basic: The basic project purpose is single-family residential development.

Overall: The basic project purpose is single-family residential development with access to navigable waterways within the city limits of Ponte Vedra Beach.

EXISTING CONDITIONS: The wetland system consists of a saltwater system. The onsite vegetation consists of smooth cordgrass. The existing area surrounding the project area consists of single-family residences, electrical distribution lines and a roadway.

PROPOSED WORK: The applicant seeks authorization to construct a pile-supported single-family residence and associated pile-supported infrastructure (driveway). The applicant also seeks authorization to construct a 956 square-foot docking structure.

AVOIDANCE AND MINIMIZATION INFORMATION – The applicant has provided the following information in support of efforts to avoid and/or minimize impacts to the aquatic environment:

“The applicant has owned the land since 2006. The applicant would like to build a dock to access Cabbage Creek on the eastern portion of the property. The dock is water dependent. Since there are no uplands within the site, the applicant has chosen to build on pilings in lieu of fill to minimize the wetland impacts. Further, the applicant would like to be within the Palm Valley area.”

COMPENSATORY MITIGATION – The applicant has offered the following compensatory mitigation plan to offset unavoidable functional loss to the aquatic environment:

“The applicant proposes to obtain 0.02 saltwater credits from Northeast Florida *Saltmarsh Wetlands Mitigation Bank*.”

CULTURAL RESOURCES:

The Corps is not aware of any known historic properties within the permit area. By copy of this public notice, the Corps is providing information for review. Our final determination relative to historic resource impacts is subject to review by and coordination with the State Historic Preservation Officer and those federally recognized tribes with concerns in Florida and the Permit Area.

ENDANGERED SPECIES:

The Corps has determined the proposed project may affect, but is not likely to adversely affect the Wood Stork, Green Sea Turtle, Loggerhead Sea Turtle, Hawksbill Sea Turtle, Kemp’s Ridley Sea Turtle, Leatherback Sea Turtle, Atlantic Sturgeon, Smalltooth Sawfish, and Shortnose Sturgeon. The Corps will request U.S. Fish and Wildlife/National Marine Fisheries Service concurrence with this determination pursuant to Section 7 of the Endangered Species Act.

ESSENTIAL FISH HABITAT (EFH): This notice initiates consultation with the National Marine Fisheries Service on EFH as required by the Magnuson-Stevens Fishery Conservation and Management Act 1996. The proposal would impact approximately .08-acre of saltmarsh habitat utilized by various life stages of shrimp. Our initial determination is that the proposed action would not have a substantial adverse impact on EFH or Federally managed fisheries in the Intracoastal Waterway. Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the National Marine Fisheries Service.

NOTE: This public notice is being issued based on information furnished by the applicant. This information has not been verified or evaluated to ensure compliance with laws and regulation governing the regulatory program. The jurisdictional line has been verified by Corps personnel.

AUTHORIZATION FROM OTHER AGENCIES: Water Quality Certification may be required from the Florida Department of Environmental Protection and/or one of the state Water Management Districts.

COMMENTS regarding the potential authorization of the work proposed should be submitted in writing to the attention of the District Engineer through the Jacksonville Permits Section, Post Office Box 4970, Jacksonville, Florida 32232-0019 within 21 days from the date of this notice.

The decision whether to issue or deny this permit application will be based on the information received from this public notice and the evaluation of the probable impact to the associated wetlands. This is based on an analysis of the applicant's avoidance and minimization efforts for the project, as well as the compensatory mitigation proposed.

QUESTIONS concerning this application should be directed to the project manager, Brad Carey, in writing at the Jacksonville Permits Section, Post Office Box 4970, Jacksonville, Florida 32232-0019; by electronic mail at brad.j.carey@usace.army.mil; or, by telephone at (904) 232-2405.

IMPACT ON NATURAL RESOURCES: Coordination with U.S. Fish and Wildlife Service, Environmental Protection Agency (EPA), the National Marine Fisheries Services, and other Federal, State, and local agencies, environmental groups, and concerned citizens generally yields pertinent environmental information that is instrumental in determining the impact the proposed action will have on the natural resources of the area.

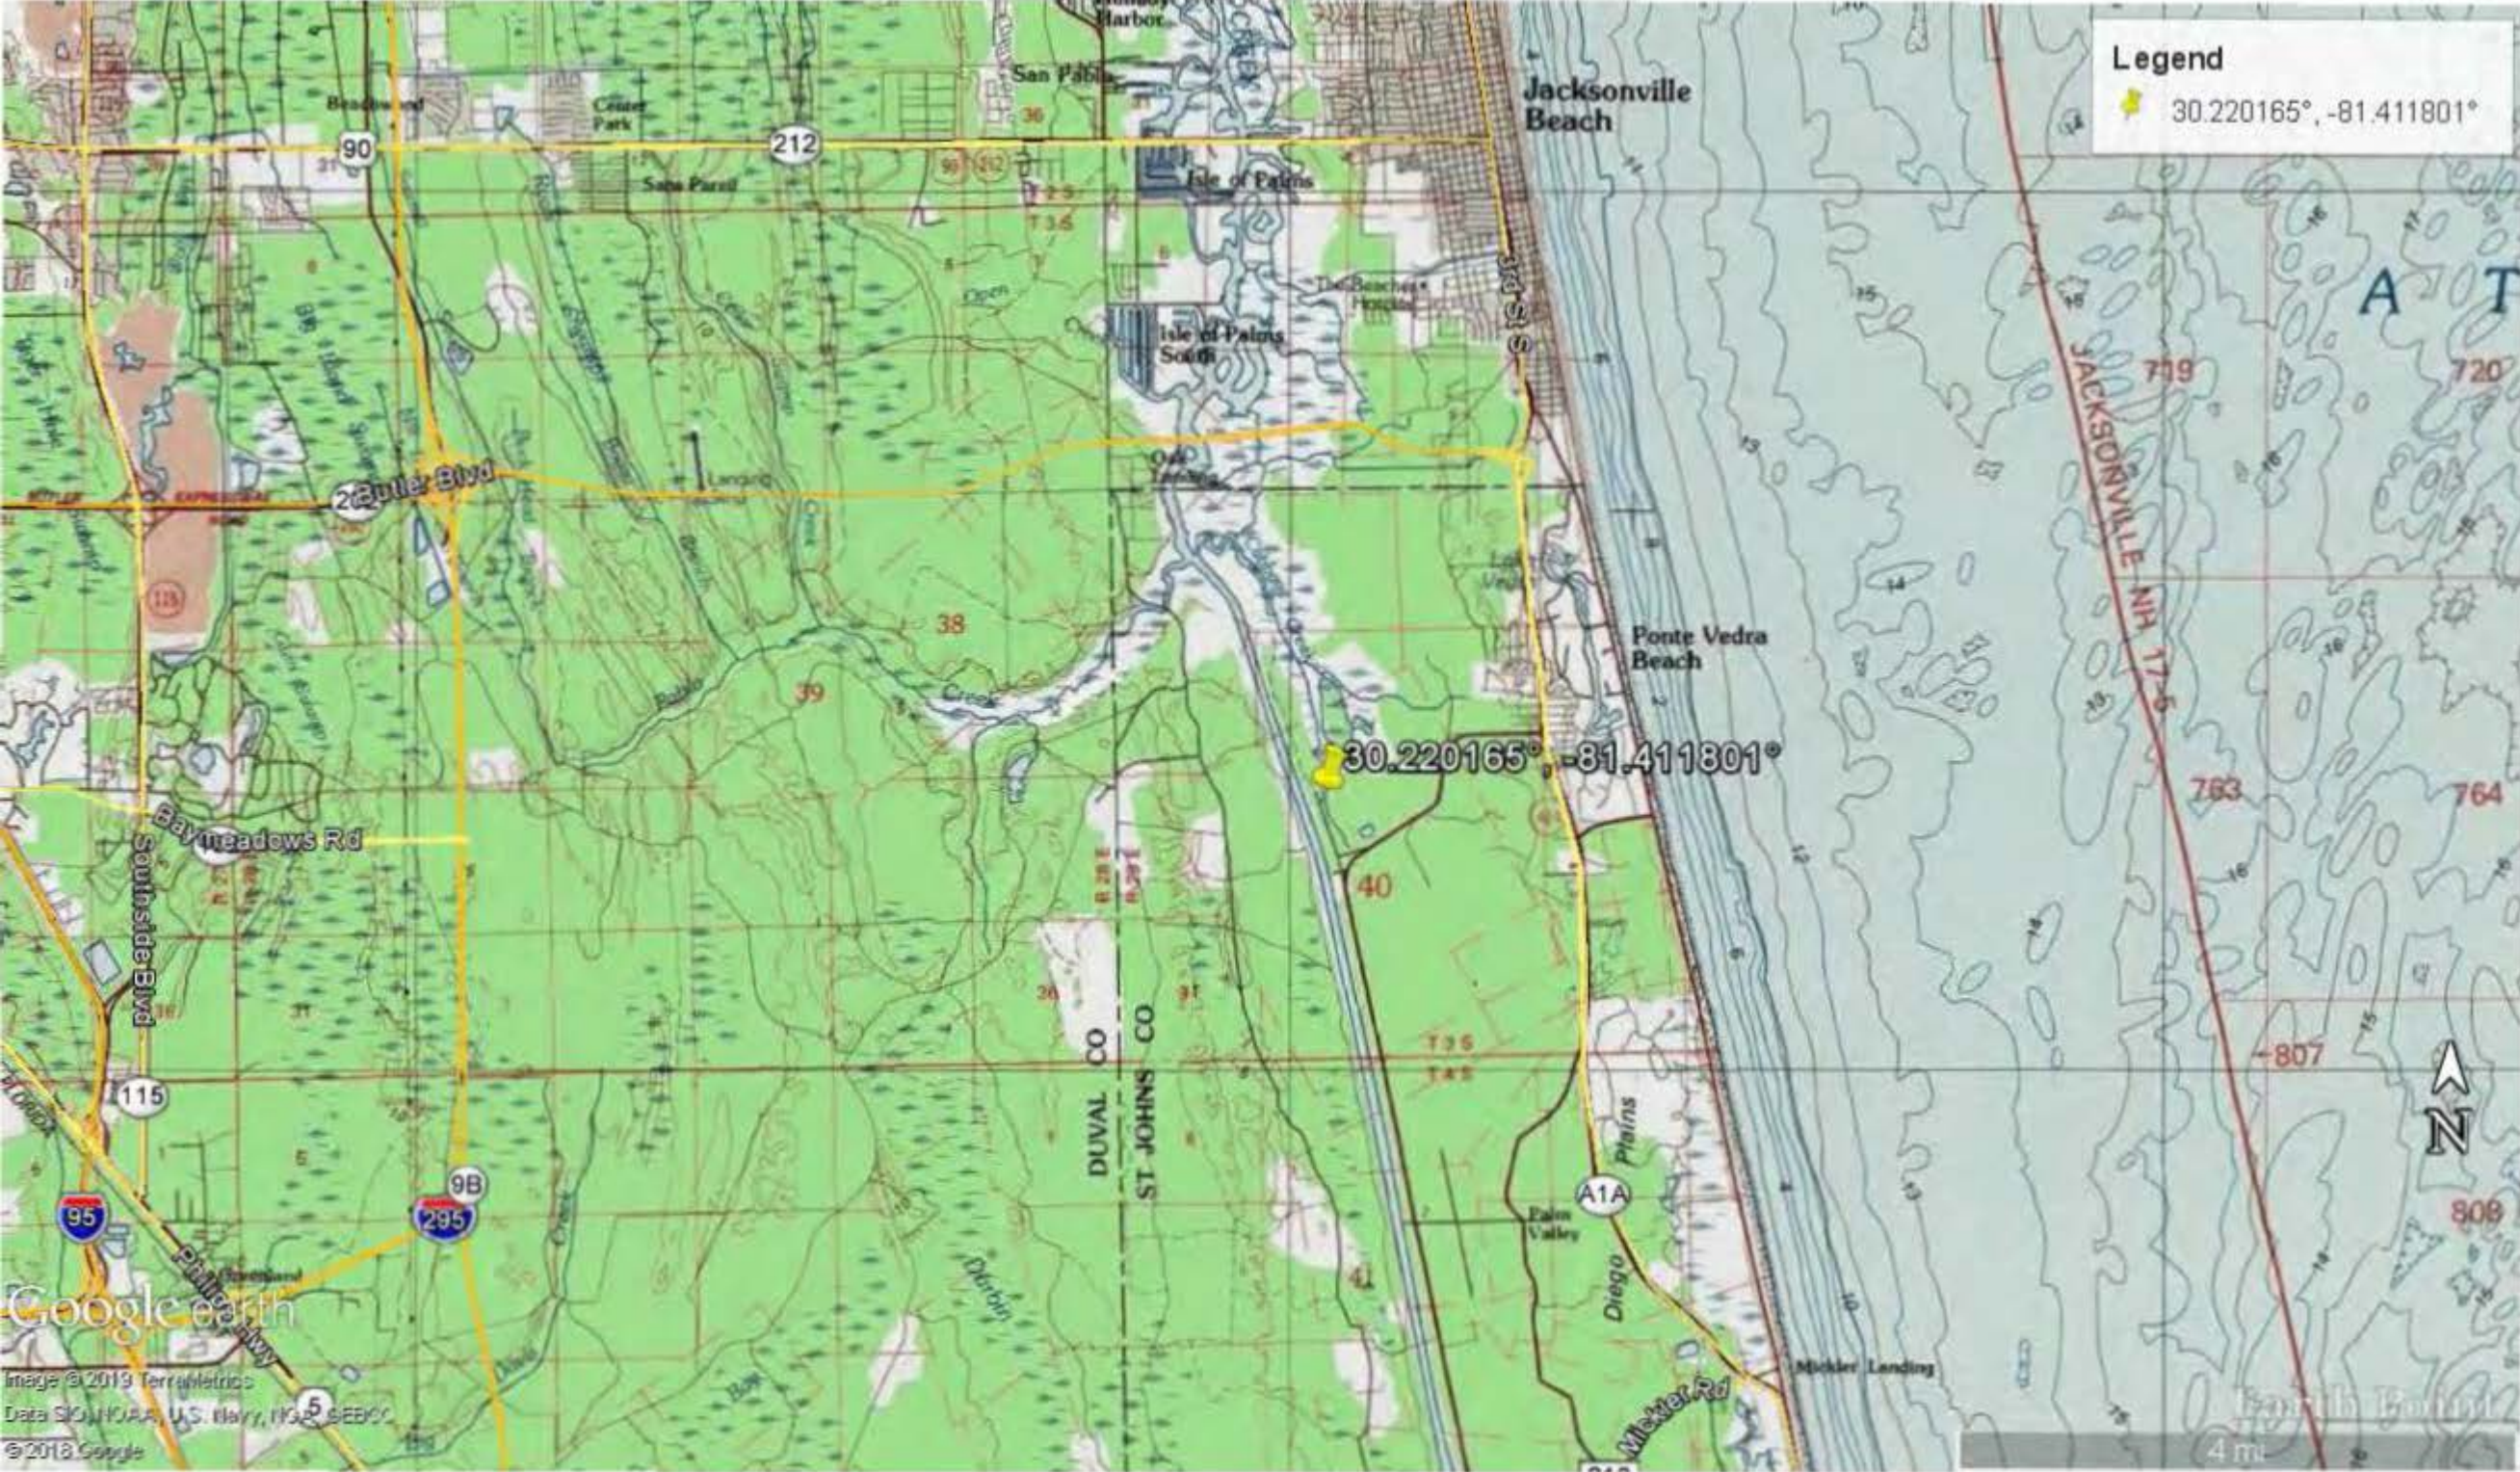

EVALUATION: The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits, which reasonably may be expected to accrue from the proposal, must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered including cumulative impacts thereof; among these are conservation, economics, esthetics, general environmental concerns, wetlands, historical properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food, and fiber production, mineral needs, considerations of property ownership, and in general, the needs and welfare of the people. Evaluation of the impact of the activity on the public interest will also include application of the guidelines promulgated by the Administrator, EPA, under authority of Section 404(b) of the Clean Water Act or the

criteria established under authority of Section 102(a) of the Marine Protection Research and Sanctuaries Act of 1972. A permit will be granted unless its issuance is found to be contrary to the public interest.

The US Army Corps of Engineers (Corps) is soliciting comments from the public; Federal, State, and local agencies and officials; Indian Tribes; and other Interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps to determine whether to issue, modify, condition, or deny a permit for this proposal. To make this determination, comments are used to assess impacts to endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

COASTAL ZONE MANAGEMENT CONSISTENCY: In Florida, the State approval constitutes compliance with the approved Coastal Zone Management Plan. In Puerto Rico, a Coastal Zone Management Consistency Concurrence is required from the Puerto Rico Planning Board. In the Virgin Islands, the Department of Planning and Natural Resources permit constitutes compliance with the Coastal Zone Management Plan.

REQUEST FOR PUBLIC HEARING: Any person may request a public hearing. The request must be submitted in writing to the District Engineer within the designated comment period of the notice and must state the specific reasons for requesting the public hearing.
