

**U.S. ARMY CORPS OF ENGINEERS  
REGULATORY PROGRAM  
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)  
NAVIGABLE WATERS PROTECTION RULE**

**I. ADMINISTRATIVE INFORMATION**

Completion Date of Approved Jurisdictional Determination (AJD): 7/23/2020  
 ORM Number: SAJ-2020-02780  
 Associated JDs: N/A  
 Review Area Location<sup>1</sup>: State/Territory: FL City: Lake Worth County/Parish/Borough: Palm Beach  
 Center Coordinates of Review Area: Latitude 26.768831 Longitude -80.108676

**II. FINDINGS**

**A. Summary:** Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

**B. Rivers and Harbors Act of 1899 Section 10 (§ 10)<sup>2</sup>**

§ 10 Name	§ 10 Size	§ 10 Criteria	Rationale for § 10 Determination
N/A.	N/A.	N/A.	N/A.

**C. Clean Water Act Section 404**

Territorial Seas and Traditional Navigable Waters ((a)(1) waters): <sup>3</sup>			
(a)(1) Name	(a)(1) Size	(a)(1) Criteria	Rationale for (a)(1) Determination
N/A.	N/A.	N/A.	N/A.

Tributaries ((a)(2) waters):			
(a)(2) Name	(a)(2) Size	(a)(2) Criteria	Rationale for (a)(2) Determination
N/A.	N/A.	N/A.	N/A.

Lakes and ponds, and impoundments of jurisdictional waters ((a)(3) waters):			
(a)(3) Name	(a)(3) Size	(a)(3) Criteria	Rationale for (a)(3) Determination
N/A.	N/A.	N/A.	N/A.

N/AN/

Adjacent wetlands ((a)(4) waters):			
(a)(4) Name	(a)(4) Size	(a)(4) Criteria	Rationale for (a)(4) Determination
N/A.	N/A.	N/A.	N/A.

<sup>1</sup> Map(s)/figure(s) are attached to the AJD provided to the requestor.

<sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

**U.S. ARMY CORPS OF ENGINEERS  
REGULATORY PROGRAM  
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)  
NAVIGABLE WATERS PROTECTION RULE**

**D. Excluded Waters or Features**

Excluded waters ((b)(1) – (b)(12)): <sup>4</sup>				
Exclusion Name	Exclusion Size		Exclusion <sup>5</sup>	Rationale for Exclusion Determination
Surface Water 1	1.21	acre(s)	(b)(8) Artificial lake/pond constructed or excavated in upland or a non-jurisdictional water, so long as the artificial lake or pond is not an impoundment of a jurisdictional water that meets (c)(6).	See section III C.
Surface Water 2	1.8	acre(s)	(b)(8) Artificial lake/pond constructed or excavated in upland or a non-jurisdictional water, so long as the artificial lake or pond is not an impoundment of a jurisdictional water that meets (c)(6).	See section III C.
Wetland 1	0.02	acre(s)	(b)(1) Non-adjacent wetland	See section III C.
Wetland 2	0.03	acre(s)	(b)(1) Non-adjacent wetland	See section III C.
Wetland 3	0.01	acre(s)	(b)(1) Non-adjacent wetland.	See section III C.

**III. SUPPORTING INFORMATION**

**A. Select/enter all resources** that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

- Information submitted by, or on behalf of, the applicant/consultant: [Site maps](#), [aerials](#), [data points](#)  
This information [is](#) sufficient for purposes of this AJD.  
Rationale:
- Data sheets prepared by the Corps: [Title\(s\)](#) and/or [date\(s\)](#).
- Photographs: [Aerial](#): [Google Earth](#)

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

REGULATORY PROGRAM  
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)  
NAVIGABLE WATERS PROTECTION RULE**

- Corps site visit(s) conducted on: *Date(s)*.
- Previous Jurisdictional Determinations (AJDs or PJDs): *ORM Number(s) and date(s)*.
- Antecedent Precipitation Tool: *provide detailed discussion in Section III.B.*
- USDA NRCS Soil Survey: *USDA Soil Map*
- USFWS NWI maps: *Title(s) and/or date(s)*.
- USGS topographic maps: *Title(s) and/or date(s)*.

**Other data sources used to aid in this determination:**

Data Source (select)	Name and/or date and other relevant information
USGS Sources	NHD- Linear Surface Water Drainage Network Map
USDA Sources	N/A.
NOAA Sources	N/A.
USACE Sources	N/A.
State/Local/Tribal Sources	N/A.
Other Sources	N/A.

**B. Typical year assessment(s):** *N/A; A Typical Year assessment was not conducted because the onsite wetlands and surface waters do not discharge directly or indirectly into an (a)(1)-(a)(3) water.*

**C. Additional comments to support AJD:**

Surface waters 1 and 2 were artificially constructed and managed golf course ponds. These artificial waters were previously utilized as a water hazard and surface water management system for the abandoned golf course. Historical aerials confirm these waters were not excavated from an (a)(1) - (a)(3) water. Furthermore, these waters do not discharge directly to an (a)(1)-(a)(3) water. These ponds are not considered impoundments.

Wetlands 1,2,3 are small herbaceous wetlands dominant with Hydrocotlye spp., an obligate wetland species, several hydrology indicators. Due to standing water soils plugs were not taken, but due to the other factors the soils are presumably hydric. The nearest identified (a)(1) – (a)(3) water appears to be the C-14 Canal, approximately 1 mile east of the site. The wetlands are found to be excluded, non-adjacent wetlands (b)(1) under the Navigable Waters Protection Rule due to the following:

1. Wetlands do not abut an (a)(1) - (a)(3) water: The wetlands are surrounded by and therefore abut managed golfcourse uplands and (b)(11) waters. Neither of these features constitute an (a)(1) - (a)(3) water.
2. Wetlands are not inundated by flooding from an (a)(1) - (a)(3) water in a typical year: As stated above, the closest the closest identified (a)(1) - (a)(3) water is the C-14 canal, located approximately 1 mile from the review area. It is not likely that the wetlands will be inundated in typical year by flooding from the C-14 due to its distance from the on-site wetlands, in conjunction with C-14's water control structures and high canal banks that prevents flooding to nearby areas.
3. Wetlands are not separated from an (a)(1) - (a)(3) water only by a natural feature: The closest (a)(1) - (a)(3) water is approximately 1 mile away and separated by several different features, including other wetlands and uplands, and not just a singular natural feature, such as a bank or dune.

**U.S. ARMY CORPS OF ENGINEERS  
REGULATORY PROGRAM  
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)  
NAVIGABLE WATERS PROTECTION RULE**

4. Wetlands are not separated from an (a)(1) - (a)(3) water only by an artificial structure allowing a direct hydrologic surface connection between the wetland and the (a)(1) - (a)(3) water in a typical year: The closest (a)(1) - (a)(3) water is approximately 1 mile away and separated by several different artificial structures, including buildings and roadways, and lacks a singular direct connection.
