Regional General Permit SAJ-93
Modification #1

Mr. Mark Crosley, Executive Director
Florida Inland Navigation District
1314 Marcinski Road
Jupiter, Florida 33477

Dear Mr. Crosley:

The U.S. Army Corps of Engineers (Corps) hereby modifies the Florida Inland Navigation District's Regional General Permit (RGP), SAJ-93, issued on April 26, 2016. The RGP authorizes the Florida Inland Navigation District to maintenance dredge the Atlantic Intracoastal Waterway, Intracoastal Waterway, and Okeechobee Waterway federal navigation channels, including wideners, along the east coast of Florida. The aforementioned channels are located in the following counties: Nassau, Duval, St. Johns, Flagler, Volusia, Brevard, Indian River, St. Lucie, Martin, Palm Beach, Broward, and Miami-Dade. This is the first modification.

In an effort to minimize impacts to swimming sea turtles the following is added to the RGP as special condition number 13.c: *Where buoys are used to mark pipelines, the Permittee shall use light weight chain, non-looping wire rope, or plastic sheathing around nylon rope to secure the buoy line to the pipeline to prevent looping.*

This modification is effective on the date of this letter. Authorization of projects that have commenced or are under contract to commence in reliance on SAJ-93 prior to the date of this letter are not affected. If you have any questions concerning this letter, please contact me by email at tori.white@usace.army.mil or by telephone at (904) 232-1658.

Sincerely,

A handwritten signature in black ink that reads "Tori K White".

Tori K. White
Deputy, Regulatory Division
