

Dear Mr. Horton,

December 9, 2011

Please accept this as my official public comment on the in-river dredging permits for the Kansas River being accepted until Dec. 9, 2011. I also request a public hearing and/or public meeting on this issue.

I strongly urge the USACE to deny all thirteen sites included in the five permits and end all in-river sand and gravel dredging on the Kansas River. In addition, I strongly urge the USACE delay its decision-making process until Kansas State University researchers release an upcoming major study on the Kaw River.

Dredging has already caused significant damage to the Kaw's riverbed and banks, to habitat in and along the river, and to water quality.

Sincerely,

Karen I. Johnson

Please accept this as my official public comment on the in-river dredging permits for the Kansas River being accepted until Dec. 9, 2011. I also request a public hearing and/or public meeting on this issue.

I strongly urge the USACE to deny all thirteen sites included in the five permits and end all in-river sand and gravel dredging on the Kansas River. In addition, I strongly urge the USACE delay its decision-making process until Kansas State University researchers release an upcoming major study on the Kaw River.

Dredging has already caused significant damage to the Kaw's riverbed and banks, to habitat in and along the river, and to water quality.

Sincerely,

Jerry Rees

Dear Mr. Horton,

December 9, 2011

Please accept this as my official public comment on the in-river dredging permits for the Kansas River being accepted until Dec. 9, 2011. I also request a public hearing and/or public meeting on this issue.

I strongly urge the USACE to deny all thirteen sites included in the five permits and end all in-river sand and gravel dredging on the Kansas River. In addition, I strongly urge the USACE delay its decision-making process until Kansas State University researchers release an upcoming major study on the Kaw River.

Dredging has already caused significant damage to the Kaw's riverbed and banks, to habitat in and along the river, and to water quality.

Sincerely, ERICA ELDRED

My address & phone: 5728-DEARBORN
