B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: Drainages lack geomorphic processes that produce OHWM. A site visit confirmed that the drainages lacked field indicators (destruction of terrestrial vegetation, sediment sorting, shelving, change in plant community, etc.) that demonstrate the feature is a stream.

1 This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
